

Features

- *Telescopic antenna mast / tripod*
- *One year standard warranty*
- *Modular Design*

Description

The double telescopic antenna mast is continuously height-adjustable over 1000mm – 2000mm.

The mast rods and feet are made of glass fibre to avoid unwanted reflections.

The modular design with two sections makes it possible to use different telescope parts and it is designed with additional supports to support more weight.

The mast can be used to install larger and heavier horn antennae like ANDRH200M1G.

Provides a secure stand and easy adjustment on uneven ground. Antennas or adapters can be customised mounted on the 3/8" or 1/4" male thread.

Specifications*

Model	MAS FG-09
Overall height adjustment	1000mm – 2000mm
Antenna or Adapter mount Screw Size	Customisable or 3/8" or 1/4" male
Material	Fibre Glass
Max weight when centre loaded	20 Kg
Diameter of circle around foot	Fixed : 1.5m
Folded Dimensions	1.7mx0.15mx0.15m
Weight	5-8 Kg
Environmental	-20°C to +40°C

** Nominal values, subject to change without notice.*

Adapters

Custom made adapters can be made for installation of various types of Antennae
